# TRANSBOUNDARY MARINE BIOTECHNOLOGY LABORATORY

Bluebiolab aims to create a transboundary marine biotechnology laboratory that promotes excellence in R&D, internationalizes R&D&I capacities and optimizes the use of research infrastructures in the territory of Galicia and Northern Portugal.

## OBJECTIVES

Support the consolidation of biotechnology as a fundamental tool.

Group the existing infrastructures, integrated in the Transboundary Marine Biotechnology Laboratory.

Develop actions to support talent and promote the mobility of researchers.

Create networks of knowledge and joint work, with actors from the scientific system.

Promote the internationalization and integration of scientific infrastructures.

## CONSORTIUM

University of Vigo - Campus do Mar (UdV-CdM)

University of A Coruña - Advanced Scientific Research Centre (Udc-CICA)

University of Santiago - Aquaculture Institute (USC)

CSIC - Instituto de Investigaciones Marinas (IIM-CSIC)

Interdisciplinary Centre of Marine and Environmental Research (CIIMAR)

University of Minho - 3Bs (UM-3Bs)

Centro Ocenográfico de Vigo (IEO)

# ACTIVITIES

**A1** Creation of the Transboundary Marine Biotechnology Laboratory - UdV-CdM

**A2** Incorporation of talent and training - USC

**A3** Promotion of Collaborative Research - IIM-CSIC

**A4** Internationalization of research - UM-3Bs

**A5** Management and Coordination - UdV-C

**A6** Communication - CIIMAR

# RESULTS

The BLUBIOLAD project, with a total budget of €1.122.152,79, will focus on achieving the following results:

Consolidation of scientific cooperation in the field of marine biotechnology between the North of Portugal and Galicia.

Attract new researchers, support mobility cross-border and training of researchers.

Strengthening and internationalization of research and innovation capacities in the territory.

Development of 3 interdisciplinary proposed research projects and 6 collaborative projects between research centers in the territory.
